

CONCUSSION CARE - NEXT STEPS

Using the ImPACT Passport® App

You have recently completed **ImPACT®**, **ImPACT Pediatric®**, **ImPACT Quick Test®**, as part of your comprehensive concussion care evaluation, or **Cognitive Impairment Screener™ (CIS)** as part of your evaluation for possible neurocognitive deficits.

Now what?

Your test scores are saved in a clinical report intended for a trained healthcare provider. It's important that **concussion care providers can access your clinical report when you need help** as you won't have a direct access to it due to its clinical nature. Your ImPACT Passport ID is a key that helps unlock your clinical data by a trained healthcare provider.

For that reason, ImPACT Applications developed **ImPACT Passport - your personal concussion care app.**

ImPACT Passport allows you to:

- Store your unique testing ID
- Record symptoms
- Grant healthcare providers access to your data

CONCUSSION CARE - NEXT STEPS

Using the ImPACT Passport® App

Where to get your ImPACT Passport ID?

Upon ImPACT completion, you'll get an ImPACT Passport ID, which you can choose to send to your preferred email. Open the ImPACT Passport App and scan the QR code found on your completion confirmation screen to upload your ID.

QR Code to upload your ID to ImPACT Passport App

ImPACT Passport ID: W3KU-2IV3-MLTX

Upon completion of ImPACT Pediatric, ImPACT Quick Test, or Cognitive Impairment Screener (CIS), ask the healthcare provider who administered the test to give you your ImPACT Passport ID.

How to get ImPACT Passport?

ImPACT Passport is available for download at Apple App Store and Google Play

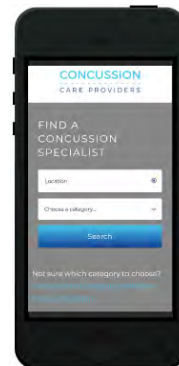

What to do with ImPACT Passport?

Save your ImPACT Passport ID to grant access to your clinical report

Report symptoms so your healthcare provider can review them real-time
