

# What is ImPACT Pediatric?

---

## INFORMATION FOR PARENTS AND GUARDIANS

### 1. How does ImPACT Pediatric<sup>®</sup> compare to ImPACT?

ImPACT Pediatric is a concussion assessment aid designed for children ages 5-11. It includes both baseline and post-injury testing in a **game-like, child-friendly format**. ImPACT Pediatric is **individually administered on an iPad** while ImPACT<sup>®</sup> can be given individually or in small groups on a laptop or desktop.

### 2. How long does it take to administer ImPACT Pediatric?

ImPACT Pediatric takes about **10-15 minutes** to administer.

### 3. What age range is appropriate for ImPACT Pediatric?

ImPACT Pediatric can be administered to **ages 5-11**.

### 4. Can parents access their child's test results?

A trained **healthcare provider is the only one that can access test results**. ImPACT **Passport app** allows you to record your child's symptoms and grant your healthcare provider's access to test results. If you can't find your child's Passport ID, contact the organization that administered a baseline or post-injury testing to retrieve it.

### 5. What healthcare providers can administer ImPACT Pediatric?

ImPACT Pediatric can be administered by anyone trained in an individual assessment of children ages 5-11. ImPACT Pediatric post-injury testing should only be administered by a trained healthcare provider who is authorized to make return to activity decisions in the state, province, or country where they practice.
