

# How to Extend Your Chiropractic Concussion Care Services

- **Create a Strong Referral Network**

Conduct community outreach to increase patient referrals.

- **Have the Right Tools in Your Concussion Treatment Protocol**

When a patient is referred to you, you'll conduct a comprehensive concussion assessment. This includes computerized neurocognitive testing which compares patient cognitive results to an extensive database of normative data.

- **Develop a Tailored Treatment Plan**

After assessing the patient, develop a tailored treatment plan that addresses the deficits you identified in your concussion evaluation.

- **Normative Data**

ImPACT has over 72,000 cases in its normative database, providing you a sound basis for decision making when baseline results are not available.

- **Patient Retention**

By offering ImPACT concussion assessments, you are able to assess a patient, recommend a treatment protocol and lead them from initial diagnosis through the end of their concussion treatment.

- **Take Advantage of Reimbursement Options**

ImPACT neurocognitive assessments have a series of recognized CPT codes\*, accepted industry and cash pay charges.

- **Why is ImPACT the right choice?**

ImPACT is the first FDA-cleared aid in the assessment and management of concussions for ages 12-80. It has been administered over 20 million times and is backed by the largest database of clinical research.
