

# IMPACT FOR IPAD

At **ImPACT Applications**, we are committed to continuously improving our products and services to better meet your needs.

To make testing more convenient, **ImPACT** is now available on an **iPad**! This provides another device option that you can use when administering our test, making your job easier.

## Key Features of ImPACT for iPad

- 1. More Options:** ImPACT for iPad provides another device option that you can use when administering our test, making your job easier.
- 2. Normative Data:** ImPACT Applications provides an iPad specific normative data set, ensuring accurate and age-appropriate assessments for individuals between 12 and 59 years old.
- 3. FDA-Cleared:** Unlike other products that are only authorized to measure cognition alone, ImPACT is the only test cleared for aiding in diagnosis in concussion.
- 4. User-Friendly:** The iPad interface enhances user experience, making the testing process more intuitive and efficient, while maintaining the scientific rigor that ImPACT Applications is known for.
